## EMPLOYMENT IN NEW SOUTH WALES

(1) The following estimates are based on the National Register of 1939, the Civilian Register of 1943, and the Occupation Survey of 1945, and returns supplied monthly by employers for purposes of Commonwealth pay-roll taxation and by governmental authorities. (2) The Pay-roll Tax returns show the number of employees whose names appeared on the last pay-roll of the month, irrespective of whether they were actually working at the end of the month. (3) Workers in rural industry, female domestics in private households, and persons on the paid strength of the defence forces are excluded.

# BUILDING ACTIVITY IN NEW SOUTH WALES

Note.—1. "Value" represents the estimated cost of the building when completed (exclusive of the land).

2. Building is classified as "government" or "private" according to ownership.
3. The value of building approved is the value of permits issued by local government councils, plus the value of contracts let or work commenced and day labour projects authorised by governmental authorities.
4. Buildings on rural holdings are for the most part excluded.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926-1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

## 44. Index of Value of Shares on Sydney Stock Exchange

The index relates to the value of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks), whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

### 50. Wholesale Price Index : Basic Materials and Foodstuffs

Compiled by Commonwealth Statistician. Prices are drawn mainly from Melbourne sources. Apart from home-produced building materials, coal, and one or two minor commodities, the index may be deemed to represent movements of wholesale prices of basic materials in most Australian markets.

\* Represents only such imported commodities as are included in the Wholesale Price Index. This Index does not measure changes in import prices generally.

† Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950. Index numbers shown in Table 50 were calculated using the auction room prices for wool. Below are shown these same indexes re-calculated on the approximate effective prices paid for raw wool for local consumption i.e. auction room price less bounty. Only four groups are affected and these are re-calculated as follows:—
